GET AROUND.

KEEP ON ROLLING: RUNFLAT TYRES.

How can you keep driving after a puncture without changing the wheel? Easy. With runflat technology. The sidewalls of the tyres are specially reinforced and made of an extremely heat-resistant rubber compound. Together with humps on the rim, this prevents the tyre from detaching after a complete loss of pressure, even when cornering. As a result, there is no need to change the wheel. Depending on the load you are carrying, you can keep going at speeds of up to 80 km/h for a further 80 kilometres.

A STAR PERFORMER.

Whenever you purchase new tyres, look out for the 5-pointed star of the MINI Original range. Positioned on the sidewall, this indicates the product has been put through its paces by MINI in conjunction with leading tyre manufacturers. These tests guarantee that the tyre meets all key safety, responsiveness and comfort requirements, and have been put together with your MINI in mind. For more information on wheel/tyre combinations and complete winter wheels, please see the product overview at the back of this catalogue, or the Accessories area of the MINI website.

Patented airpad technology, paired with a single-hand belt adjustment system, deliver safety and practicality in equal measure, while ISOFIX connections mean the seats could not be easier to install. And with a choice of Union Jack and Vivid Green designs, their looks are as impressive as their performance.
